```
140 (int equivalent of 1.40)
entry 1
          The first experiment of the file
                              Stack of 30,000 strings with the shot identifiers
      sample 1
                      "Perfect Crystals"
                Link to instrument 1/detector 1
      instrument 1
                        "CXI"
               source_1
                                1.282e-15 (J)
               detector 1
                             CSPAD Detector
                                  0.45 (m)
                               Image stack with size 30,000 x 64 x 185 x 194
                              experiment identifier:module identifier:y:x
                       axes
                       corner positions
                                          30,000 x 64 x 3 array of module corner positions
                            axes
                                   experiment identifier:module identifier:coordinate
                                       30,000 x 64 x 2 x 3 array of module basis vectors
                           axes
                                  experiment identifier:module identifier:dimension:coordinate
                       module identifier
                                           Stack of 64 strings with the names of the modules
                                               Link to /entry 1/experiment identifier
